March 10, 2010

ACTION ITEM:

User Agreements between the City of Overland Park and the following agencies for Intergraph services:

- Johnson County Park and Recreation District
- City of Lenexa

POLICY ISSUE:

Whether to approve the User Agreement for Intergraph services between the City of Overland Park and the above agencies.

STAFF RECOMMENDATION:

Approval of the User Agreement for Intergraph services between the City of Overland Park and the above agencies.

BACKGROUND:

Intergraph Public Safety is the software vendor utilized by the Overland Park Police Department to provide its suite of software to accomplish such tasks as records management, police dispatching, investigative case management etc. Since the system's inception, several other neighboring law enforcement entities have implemented the use of our system.

The above listed agencies have requested to continue their access to the Intergraph software suite of products owned and operated by the Overland Park, KS Police Department. For this access, each city will be paying the City of Overland Park a fee consistent with the language of the agreements.

BUDGETARY IMPACT:

The payments received will assist in offsetting costs associated with Overland Park's operation of the system.
